

METHODS FOR TREATING AN ISCHEMIC DISORDER AND IMPROVING STROKE  
OUTCOME

Abstract of the Disclosure

5 The present invention provides for a method for treating an  
ischemic disorder in a subject which comprises administering to  
the subject a pharmaceutically acceptable form of a selectin  
antagonist in a sufficient amount over a sufficient time period  
to prevent white blood cell accumulation so as to treat the  
10 ischemic disorder in the subject. The invention further provides  
a method for treating an ischemic disorder in a subject which  
comprises administering to the subject carbon monoxide gas in a  
sufficient amount over a sufficient period of time thereby  
treating the ischemic disorder in the subject. The invention  
15 further provides a method for treating an ischemic disorder in a  
subject which comprises administering to the subject a  
pharmaceutically acceptable form of inactivated Factor IX in a  
sufficient amount over a sufficient period of time to inhibit  
coagulation so as to treat the ischemic disorder in the subject.
